

EnVision® GIS MAPS to view! (24 total)

- **Corn Hybrid Placement (With Hybrid Placement Recommendations)**
- **Soybean Seed Category (General Map with no Rec's)**
- **Soybean Chlorosis Map (With Variety Placement Recommendations)**
- **Soybean Phytophthora Map (With Variety Placement Recommendations)**
- **Nitrogen Management (With helpful popup boxes when clicking on legends)**
- **Nutrient Zone Management (With helpful popup boxes when clicking on legends)**
- **Soil Type**
- **Soil Slope**
- **Eroded Soils**
- **NRCS Corn Yield**
- **NRCS Soybean Yield**
- **Plant Available Water Capacity**
- **Rooting Zone Drainage**
- **Seasonal High Water Table**
- **Soil Permeability**
- **NRCS pH Index (Low)**
- **NRCS pH Index (Representative)**
- **NRCS pH Index (High)**
- **NRCS Cation Exchange Capacity (Low)**
- **NRCS Cation Exchange Capacity (Representative)**
- **NRCS Cation Exchange Capacity (High)**
- **NRCS Organic Matter (Low)**
- **NRCS Organic Matter (Representative)**
- **NRCS Organic Matter (High)**

Availability!

Geographic Availability

EnVision® is now available for select counties nationwide for use of placing seed. **EnVision®** will be limited to counties that have both GPS oriented soil maps and NRCS soil tabular data. This will include approximately 1,800 Counties out of a possible 3,140 total counties in all of the US that will have either NRCS SSurgo or SSurgo2 data available in 2005. Also included will be counties that have either SSIS or NASIS digitized soil maps and available NRCS "Soil Data Mart" soil tabular data. As the NRCS releases new SSurgo, SSurgo2, or soil tabular data for counties

that have GPS oriented soil maps, they will be added to the data base. To insure availability, local agronomists and seed dealers must pre-order counties needed. Some counties will not be completed with EnVision® for obvious terrain reasons or lack of cropping in certain parts of the US. Right now we are only placing Corn and Soybeans, with the expectations to expand to other crops as we go along. Call us if you have a specific crop you want placed and we will see what we can get done for you!
